

# STUDIO BUNDLE

## HOOKUP GUIDE

### Congratulations on your purchase of the Studio Bundle!

This handy kit has all of the key components you need to get professional recordings at home with tons of room to grow. The diagram below will help you get everything hooked up.

The **EM-91C** condenser microphone ① is connected to channel 1 ② and the **EM-89D** microphone ③ on channel 2 ④ of the **Big Knob Studio**. Check the **Big Knob Studio** manual for tips on getting gains and monitoring set up (This thing has a lot of switches and jacks, the manual is a lifesaver).

To get sound from the **EM-91C**, make sure the +48V switch on the **Big Knob** is on; this will supply power to the mic and don't worry, the **EM-89D** will not be damaged.

To hear yourself and anything else connected to the **Big Knob**, connect your snazzy new **MC-100** headphones ⑤ to either phones jack ⑥ (it's got a cute little headphone icon ). The level for these is controlled via the knob directly above the jack.

What about the monitors?! Grab those 1/4" cables included in the box and connect the L and R on the powered **CR3-X** ⑦ to the L and R on Monitor A ⑧ on the **Big Knob**.

Last but not least, connect your **Big Knob Studio** via USB ⑨ to your computer. For a detailed guide, head back into the manual to get the lowdown, or visit [Mackie.com/big-knob](http://Mackie.com/big-knob).
