

OPTO BRANCH 8™

user manual 1.0

PRODUCT INFORMATION

INTRODUCTION

The **OPTO BRANCH 8™** is a 19" single rack space, 8-way DMX distributor/booster with 5-pin XLR input and output jacks. This unit takes the incoming DMX signal and splits it to eight (8) separate outputs, each providing a total electrical isolation of up to 1000V between different branches in a daisy chain group. This greatly decreases problems with ground loops and efficiently buffers and magnifies the DMX signal, making it more accurate and reliable. All outputs include 5-pin XLR sockets, which are electronically isolated from each other to ensure uninterrupted data. In addition, each output has dedicated drivers to boost the incoming signal.
